

The global economic crisis has made it **increasingly difficult for young people** to find employment. The **E-SKILLS PROJECT** is working to promote the **inclusion of young people in the workplace** through acquiring appropriate **digital skills**.

Young people today are a **digital generation** and the knowledge of **new technologies** is an essential component of most jobs. Yet often the skills of the digital generation do not match the employability and ICT skills demanded by employers. This Project aims to establish a culture of lifelong learning that will enable young people to match labour market demand, keep their e-skills up-to-date and ultimately become more **competitive** in this sector of **continuous growth and transformation**.

E-SKILLS is an **international project** involving institutions in Spain, Germany, Italy and the UK. Some of their resources for young people and the ICT sector are listed below:

RED LOCAL CONSORTIUM (SPAIN)

Available resources to promote and support the employment of youth in the ICT sector in the Community of Madrid and Red Local .

-Entrepreneurs' Plan of the Community of Madrid
